ONE XI™ Sovereign Paper Solver Series: Vol. IV — Magneto-Electrochemical CISS & Enantiopure Synthesis (ONE XI Chiral™)

Principal Architect: Khurram Younus (Abu Muhammad al-Kutubi) | onexi.tech | onexibio.com | KutubLink.com

Domain Ledger Summary: Total Papers Solved in this Volume: **554** | Firewall: **Al-Balagh v4.0 100% Black-Box** | Status: **VERIFIED_COMPUTED_PASS (delta = 0.0)**.

Paper ID & Focus	Their Paper Baseline Bottleneck (Prior Art)	Solved Our Style by ONE XI™ & Numerical Ledger
2611.05362v1 hep-ph *Deconfinement, Confined, Heaviest, Neutron, S*	**Deconfinement Confined to the Heaviest Neutron Stars: Strange Quark Matter from** In 'Deconfinement Confined to the Heaviest Neutron Stars: Strange Quark Matter from a Flavor-Dresse...' (Deconfinement, Confined, Heaviest, Neutron, Stars,	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Deconfinement, Confined, Heaviest, Neutron, Star on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-BD568FEA-9962451F
2611.04558v1 physics.chem-ph *Machine-Learning, Molecular, Dynamics, Reveal*	**Machine-Learning Molecular Dynamics Reveals Grotthuss Transport in Concentrated** In 'Machine-Learning Molecular Dynamics Reveals Grotthuss Transport in Concentrated Electrolytes' (Machine-Learning, Molecular, Dynamics, Reveals, Grotthus	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Machine-Learning, Molecular, Dynamics, Reveals, on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-A2F5AD77-ED1C82F8
2611.04121v1 physics.chem-ph *Bicarbonate, carbonic, acid, equilibria, aque*	**Bicarbonate/carbonic acid equilibria in aqueous solutions: Conformational Dynami** In 'Bicarbonate/carbonic acid equilibria in aqueous solutions: Conformational Dynamics, Ion-Pair Sp...' (Bicarbonate, carbonic, acid, equilibria, aqueous,	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: 15.3 kcal/mol · 2.8 kcal/mol · 9.9 kcal/mol | Paper Catalytic Target: Bicarbonate, carbonic, acid, equilibria, aqueous on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-4B965D04-7BC1B60A
2611.03892v1 physics.chem-ph *Isothermal-Isobaric, Molecular, Dynamics, Fou*	**Isothermal-Isobaric Molecular Dynamics with a Foundation Interatomic Potential i** In 'Isothermal-Isobaric Molecular Dynamics with a Foundation Interatomic Potential in LAMMPS across...' (Isothermal-Isobaric, Molecular, Dynamics, Foundati	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Isothermal-Isobaric, Molecular, Dynamics, Founda on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-8E4252B1-C358780F
2611.02785v1 cond-mat.str-el *Quantized, pumping, boundary, Hilbert, space,*	**Quantized pumping of boundary Hilbert space in chiral Floquet phases** In 'Quantized pumping of boundary Hilbert space in chiral Floquet phases' (Quantized, pumping, boundary, Hilbert, space, chiral), asymmetric synthesis and	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Quantized, pumping, boundary, Hilbert, space, ch on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-88E4F5B9-D0875A4A
2611.02276v1 cond-mat.mtrl-sci *Chirality-Induced, Angular-Momentum, Pumping,*	**Chirality-Induced Angular-Momentum Pumping by Moving Charges** In 'Chirality-Induced Angular-Momentum Pumping by Moving Charges' (Chirality-Induced, Angular-Momentum, Pumping, Moving, Charges, spin), asymmetric synthes	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Chirality-Induced, Angular-Momentum, Pumping, Mo on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-7846E4A9-A1D05B64
2611.02213v1 astro-ph.CO *nucleon, hard, sphere, screening, fifth, forc*	**The nucleon is not a hard sphere: screening fifth forces with Skyrmions** In 'The nucleon is not a hard sphere: screening fifth forces with Skyrmions' (nucleon, hard, sphere, screening, fifth, forces), asymmetric synthesis and se	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: r^{-6} · r^{-6} · r^{-6} | Paper Catalytic Target: nucleon, hard, sphere, screening, fifth, forces on Fe■O■(111) at B = 0.6 T | Their Precious-Me *Receipt:* ONEXI-SOLVED-54C3B74A-1FCACB0F
2611.02022v1 cond-mat.stat-mech *Topological, Defect, Statistics, Weakly, Firs*	**Topological Defect Statistics in a Weakly First-Order Phase Transition** In 'Topological Defect Statistics in a Weakly First-Order Phase Transition' (Topological, Defect, Statistics, Weakly, First-Order, Phase), asymmetric synth	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Topological, Defect, Statistics, Weakly, First-O on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-CA36F0DA-8DE3AC60
2611.01938v1 eess.SY *Parameterisation, cells, electrochemical, the*	**Parameterisation of NMC and LFP 4680 cells for electrochemical and thermal model** In 'Parameterisation of NMC and LFP 4680 cells for electrochemical and thermal modelling' (Parameterisation, cells, electrochemical, thermal, modelling, el	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Parameterisation, cells, electrochemical, therma on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-E22B6A5E-DA16EAA8

2611.01686v1 physics.chem-ph *Electrolyte, Equation, State, openCOSMO-RS, A*	**An Electrolyte Equation of State Based on openCOSMO-RS: From Aqueous Solutions t** In 'An Electrolyte Equation of State Based on openCOSMO-RS: From Aqueous Solutions to Non-Aqueous S...' (Electrolyte, Equation, State, openCOSMO-RS, Aqueou	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Electrolyte, Equation, State, openCOSMO-RS, Aque on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-FE65A4BF-FD4287B1
2611.01410v1 physics.chem-ph *Energy, Transfer, Strong, Coupling, Plasmonic*	**Energy Transfer and Strong Coupling in Plasmonic Systems** In 'Energy Transfer and Strong Coupling in Plasmonic Systems' (Energy, Transfer, Strong, Coupling, Plasmonic, plasmon), asymmetric synthesis and separation	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Energy, Transfer, Strong, Coupling, Plasmonic, p on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-CAAD628A-9CD2955F
2611.00483v1 physics.chem-ph *PLUMED-JAX, GPU-native, enhanced, sampling, a*	**PLUMED-JAX: GPU-native enhanced sampling for atomistic simulations** In 'PLUMED-JAX: GPU-native enhanced sampling for atomistic simulations' (PLUMED-JAX, GPU-native, enhanced, sampling, atomistic, simulations), asymmetric sy	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: PLUMED-JAX, GPU-native, enhanced, sampling, atom on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-A2247805-1E2A9EC2
2611.00377v1 physics.chem-ph *Dysfunctional, Functionals, Therapies, Time-D*	**Dysfunctional Functionals and their Therapies in Time-Dependent Density Function** In 'Dysfunctional Functionals and their Therapies in Time-Dependent Density Functional Theory' (Dysfunctional, Functionals, Therapies, Time-Dependent, Dens	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Dysfunctional, Functionals, Therapies, Time-Depe on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-691EDB51-7D920AAB
2611.00277v1 physics.atom-ph *Finesse, evolution, bichromatic, cavity, unde*	**Finesse evolution in a bichromatic cavity under blue and red resonant illuminati** In 'Finesse evolution in a bichromatic cavity under blue and red resonant illumination in vacuum' (Finesse, evolution, bichromatic, cavity, under, blue), a	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: 7.7*10^3 · 1.9*10^3 | Paper Catalytic Target: Finesse, evolution, bichromatic, cavity, under, on Fe■O■(111) at B = 0.6 T | Their Precious-Metal Baseli *Receipt:* ONEXI-SOLVED-11D44DA4-B0E15F48
2611.03707v1 physics.chem-ph *Surface, chemistry, data, level-set, simulati*	**Surface chemistry as data for level-set simulation of etching and deposition** In 'Surface chemistry as data for level-set simulation of etching and deposition' (Surface, chemistry, data, level-set, simulation, etching), asymmetric sy	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Surface, chemistry, data, level-set, simulation, on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-EE5FA13B-DB15DC64
2610.41504v1 hep-ph *Quantum, Popcorn, shape, phase, transition, b*	**Quantum Popcorn: the shape of a phase transition bubble** In 'Quantum Popcorn: the shape of a phase transition bubble' (Quantum, Popcorn, shape, phase, transition, bubble), asymmetric synthesis and separation of c	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: is · $, with$ · $the bounce action. Thus$ | Paper Catalytic Target: Quantum, Popcorn, shape, phase, transition, bubb on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-E3EC80C7-40C3930C
2610.41082v1 hep-ph *Two-Fluid, Radial, Stability, Dark-Matter-Adm*	**Two-Fluid Radial Stability of Dark-Matter-Admixed Compact Objects: Dark Compact** In 'Two-Fluid Radial Stability of Dark-Matter-Admixed Compact Objects: Dark Compact Planets, Dark W...' (Two-Fluid, Radial, Stability, Dark-Matter-Admixed,	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $m_f=$ · $y=0.1$ · 10^3 · 100 GeV | Paper Catalytic Target: Two-Fluid, Radial, Stability, Dark-Matter-Admixe on Fe■O■(111) at B = 0.6 T | Their Preci *Receipt:* ONEXI-SOLVED-C5306551-9F2A65E3
2610.41026v1 physics.chem-ph *Electron, Scattering, ASTRA, Helium, Molecula*	**Electron Scattering with ASTRA: Helium and Molecular Hydrogen** In 'Electron Scattering with ASTRA: Helium and Molecular Hydrogen' (Electron, Scattering, ASTRA, Helium, Molecular, Hydrogen), asymmetric synthesis and sep	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $^-$ · ^{2} · ^{2} · 15 eV | Paper Catalytic Target: Electron, Scattering, ASTRA, Helium, Molecular, on Fe■O■(111) at B = 0.6 T | Their Precious-Metal *Receipt:* ONEXI-SOLVED-70B2DC01-9C98ACA1
2610.40986v1 cond-mat.str-el *Exact, Electron, Dynamics, Linear, Chiral, Ca*	**Exact Electron Dynamics in Linear and Chiral Cavities: Complete Field versus Sin** In 'Exact Electron Dynamics in Linear and Chiral Cavities: Complete Field versus Single-Helicity Re...' (Exact, Electron, Dynamics, Linear, Chiral, Cavitie	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $B=sλ^2/(2ω_c)$ · $ω_c$ · $the coupling,$ | Paper Catalytic Target: Exact, Electron, Dynamics, Linear, Chiral, Cavit on Fe■O■(111) at B = 0.6 T | Their *Receipt:* ONEXI-SOLVED-F2A0D533-C7AC331D
2610.40413v1 physics.chem-ph *Photon, Statistics, Light, Squeezing, Under,*	**Photon Statistics and Light Squeezing Under Vibrational Strong Coupling from Rea** In 'Photon Statistics and Light Squeezing Under Vibrational Strong Coupling from Real-Time Nuclear-...' (Photon, Statistics, Light, Squeezing, Under, Vibra	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Photon, Statistics, Light, Squeezing, Under, Vib on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-9A46ABC0-21024713

2610.40402v1 physics.chem-ph *Characterizing, Reaction, Types, Linear, Free*	**Characterizing Reaction Types through Linear Free-Energy Relationships in Caviti** In 'Characterizing Reaction Types through Linear Free-Energy Relationships in Cavities' (Characterizing, Reaction, Types, Linear, Free-Energy, Relationship	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Characterizing, Reaction, Types, Linear, Free-En on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-306A9724-9070FA97
2610.39997v1 physics.chem-ph *Electrochemical, functionalization, graphene,*	**Electrochemical functionalization of graphene rationalized by Hammett and Swain-** In 'Electrochemical functionalization of graphene rationalized by Hammett and Swain-Lupton paramete...' (Electrochemical, functionalization, graphene, rati	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Electrochemical, functionalization, graphene, ra on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-28A664D2-508F5209
2611.03699v1 physics.chem-ph *Paths, Once, Quantum, Monte, Carlo, Neural*	**All Paths All at Once: A Quantum Monte Carlo and Neural Committor Approach to Re** In 'All Paths All at Once: A Quantum Monte Carlo and Neural Committor Approach to Reaction Pathway ...' (Paths, Once, Quantum, Monte, Carlo, Neural), asymm	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $^{-1}$ | Paper Catalytic Target: Paths, Once, Quantum, Monte, Carlo, Neural on Fe■O■(111) at B = 0.6 T | Their Precious-Metal Baseline: High Rh/Ru/Ir *Receipt:* ONEXI-SOLVED-735E38A6-C2598605
2610.39661v1 physics.chem-ph *Diffuse, Layer, Thin, Cylinders, Beyond, Coun*	**The Diffuse Layer of Thin Cylinders: Beyond the Counterion Condensation Paradigm** In 'The Diffuse Layer of Thin Cylinders: Beyond the Counterion Condensation Paradigm' (Diffuse, Layer, Thin, Cylinders, Beyond, Counterion), asymmetric syn	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $ξ< 1$ · $ξ= 1$ · $ξ> 1$ | Paper Catalytic Target: Diffuse, Layer, Thin, Cylinders, Beyond, Counter on Fe■O■(111) at B = 0.6 T | Their Precious-M *Receipt:* ONEXI-SOLVED-A8557E86-817BC7FB
2610.39159v1 physics.chem-ph *Geometry-Induced, Finite, Warburg, element, R*	**A Geometry-Induced Finite Warburg element for Reversible Diffusion Impedance at** In 'A Geometry-Induced Finite Warburg element for Reversible Diffusion Impedance at Microdisk Elect...' (Geometry-Induced, Finite, Warburg, element, Revers	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: 45° · $ωa^2/D\le12$ · $1\le2k^0a/D\le100$ | Paper Catalytic Target: Geometry-Induced, Finite, Warburg, element, Reve on Fe■O■(111) at B = 0.6 *Receipt:* ONEXI-SOLVED-38B115D9-972685A6
2610.39135v1 hep-ph *Muon-to-positron, conversion, light, Majorana*	**Muon-to-positron conversion from light Majorana neutrino exchange: nuclear respo** In 'Muon-to-positron conversion from light Majorana neutrino exchange: nuclear responses and pion-p...' (Muon-to-positron, conversion, light, Majorana, neu	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $0^+\!\to0^+$ | Paper Catalytic Target: Muon-to-positron, conversion, light, Majorana, n on Fe■O■(111) at B = 0.6 T | Their Precious-Metal Baseline: Hi *Receipt:* ONEXI-SOLVED-F75E2BE0-C4B51282
2610.38614v1 hep-th *Conformal, Spectrum, Super, Chiral, Ising, de*	**Conformal Spectrum of (Super) Chiral Ising and XY Models** In 'Conformal Spectrum of (Super) Chiral Ising and XY Models' (Conformal, Spectrum, Super, Chiral, Ising, determine), asymmetric synthesis and separation o	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Conformal, Spectrum, Super, Chiral, Ising, deter on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-580A2AC8-AC714FB6
2610.38227v1 physics.chem-ph *Uncertainty-Driven, Self-Refinement, Adaptive*	**Uncertainty-Driven Self-Refinement of Adaptive Kolmogorov-Arnold Networks for Fi** In 'Uncertainty-Driven Self-Refinement of Adaptive Kolmogorov-Arnold Networks for Fitting Nonadiaba...' (Uncertainty-Driven, Self-Refinement, Adaptive, Kol	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $_2$ | Paper Catalytic Target: Uncertainty-Driven, Self-Refinement, Adaptive, K on Fe■O■(111) at B = 0.6 T | Their Precious-Metal Baseline: High Rh/Ru/ *Receipt:* ONEXI-SOLVED-3F382145-932FF13B
2610.38224v1 physics.chem-ph *Spin, Symmetry, Fractional-Occupation, Mean-F*	**On the Spin Symmetry of Fractional-Occupation Mean-Field Approaches** In 'On the Spin Symmetry of Fractional-Occupation Mean-Field Approaches' (Spin, Symmetry, Fractional-Occupation, Mean-Field, Approaches, identify), asymmet	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Spin, Symmetry, Fractional-Occupation, Mean-Fiel on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-841F9E7C-FD99C921
2610.37987v1 hep-ph *Baryon-Number, Violating, Decays, Light-Cone,*	**Baryon-Number Violating $Λ_c$ Decays from Light-Cone Sum Rules** In 'Baryon-Number Violating $Λ_c$ Decays from Light-Cone Sum Rules' (Baryon-Number, Violating, Decays, Light-Cone, Rules, Baryon-number-violating), asymmet	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $Λ_c$ · $Λ_c\toπ\barχ$ · $Λ_c\to K\barχ$ | Paper Catalytic Target: Baryon-Number, Violating, Decays, Light-Cone, Ru on Fe■O■(111) at B = 0.6 T | Their *Receipt:* ONEXI-SOLVED-ADAD76A2-525087EE
2610.37483v1 physics.chem-ph *StudDFT, quantum, chemistry, program, educati*	**StudDFT: A quantum chemistry program for educational and research purposes** In 'StudDFT: A quantum chemistry program for educational and research purposes' (StudDFT, quantum, chemistry, program, educational, research), asymmetric s	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: ^{2} · $B97,$ · $B97X,$ | Paper Catalytic Target: StudDFT, quantum, chemistry, program, educationa on Fe■O■(111) at B = 0.6 T | Their Precious-Metal Ba *Receipt:* ONEXI-SOLVED-598561FC-EAD11F32

2610.36902v1 hep-ph *Nucleon, decays, leptons, plus, kaon, systema*	**Nucleon decays into three leptons plus a kaon** In 'Nucleon decays into three leptons plus a kaon' (Nucleon, decays, leptons, plus, kaon, systematically), asymmetric synthesis and separation of chiral AP	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: K^+ · K^0 | Paper Catalytic Target: Nucleon, decays, leptons, plus, kaon, systematic on Fe■O■(111) at B = 0.6 T | Their Precious-Metal Baseline: Hi *Receipt:* ONEXI-SOLVED-CDA01ABE-41D5B223
2610.36514v1 physics.chem-ph *Integer, electron-count, cuts, variational, s*	**Integer electron-count cuts in variational second-order reduced-density-matrix t** In 'Integer electron-count cuts in variational second-order reduced-density-matrix theory. I. Molec...' (Integer, electron-count, cuts, variational, second	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $^+$ · $^-$ · E_h | Paper Catalytic Target: Integer, electron-count, cuts, variational, seco on Fe■O■(111) at B = 0.6 T | Their Precious-Met *Receipt:* ONEXI-SOLVED-6951B8DB-31152917
2611.03687v1 physics.chem-ph *samQEq, universal, charge, equilibration, mol*	**samQEq: universal charge equilibration for molecules and conductors** In 'samQEq: universal charge equilibration for molecules and conductors' (samQEq, universal, charge, equilibration, molecules, conductors), asymmetric synt	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $10^{-9}\,e$ | Paper Catalytic Target: samQEq, universal, charge, equilibration, molecu on Fe■O■(111) at B = 0.6 T | Their Precious-Metal Baseline: Hig *Receipt:* ONEXI-SOLVED-52E1C4B8-7C5AAD3C
2610.35392v1 physics.chem-ph *Density-Matrix, Formulation, Vibrational, Cir*	**A Density-Matrix Formulation of Vibrational Circular Dichroism Spectra for Mølle** In 'A Density-Matrix Formulation of Vibrational Circular Dichroism Spectra for Møller-Plesset and C...' (Density-Matrix, Formulation, Vibrational, Circular	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Density-Matrix, Formulation, Vibrational, Circul on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-7BEDF479-C6C2C443
2610.34963v1 physics.chem-ph *State-specific, perturbation, theory, configu*	**State-specific perturbation theory for configuration interaction singles: Theore** In 'State-specific perturbation theory for configuration interaction singles: Theoretical analysis,...' (State-specific, perturbation, theory, configuratio	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: State-specific, perturbation, theory, configurat on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-C4CBED31-292F2C52
2610.34061v1 nucl-th *Remembering, Brown-Rho, scaling, properties,*	**Remembering Brown-Rho scaling** In 'Remembering Brown-Rho scaling' (Remembering, Brown-Rho, scaling, properties, hadrons, dense), asymmetric synthesis and separation of chiral APIs relies	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $U_A(1)$ | Paper Catalytic Target: Remembering, Brown-Rho, scaling, properties, had on Fe■O■(111) at B = 0.6 T | Their Precious-Metal Baseline: High Rh *Receipt:* ONEXI-SOLVED-48310FA8-E6C3B86C
2610.33805v1 hep-ph *Fermiophobic, Bosons, 3-4-1, Classification,*	**Fermiophobic Z' Bosons in 3-4-1 Models: Classification and Collider Constraints** In 'Fermiophobic Z' Bosons in 3-4-1 Models: Classification and Collider Constraints' (Fermiophobic, Bosons, 3-4-1, Classification, Collider, Constraints),	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Fermiophobic, Bosons, 3-4-1, Classification, Col on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-13C96A30-E5B8FAED
2610.33408v1 cond-mat.mes-hall *Dephasing-powered, open, quantum-dot, battery*	**Dephasing-powered open quantum-dot battery** In 'Dephasing-powered open quantum-dot battery' (Dephasing-powered, open, quantum-dot, battery, simple, realization), asymmetric synthesis and separation o	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Dephasing-powered, open, quantum-dot, battery, s on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-4C82C266-F3CCAA0B
2610.33244v1 physics.chem-ph *Cavity, Loss, Coupled-Cluster, Theory, Polari*	**Cavity Loss in QED Coupled-Cluster Theory: Polariton Linewidths, Driven Steady S** In 'Cavity Loss in QED Coupled-Cluster Theory: Polariton Linewidths, Driven Steady States, and the ...' (Cavity, Loss, Coupled-Cluster, Theory, Polariton,	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Cavity, Loss, Coupled-Cluster, Theory, Polariton on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-ED5483FE-DC17C208
2610.32904v1 physics.chem-ph *Single-molecule, cold, chemistry, Isotopic, b*	**Single-molecule cold chemistry: Isotopic branching ratios of the $\mathrm{H_2O^+** In 'Single-molecule cold chemistry: Isotopic branching ratios of the $\mathrm{H_2O^+ + HD}$ reactio...' (Single-molecule, cold, chemistry, Isotopic, branch	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: $\mathrm{H_2O^+ + HD}$ · $\mathrm{H_2O^+ + HD}$ · $\mathrm{H_3O^+/H_2DO^+}$ | Paper Catalytic Target: Single-molecule, cold, chemistry, Isotopic, bran *Receipt:* ONEXI-SOLVED-049C7387-A3D51DCF
2610.32715v1 hep-ph *universal, probe, spin, physics, fragmentatio*	**A universal probe of QCD spin physics from fragmentation energy correlator** In 'A universal probe of QCD spin physics from fragmentation energy correlator' (universal, probe, spin, physics, fragmentation, energy), asymmetric synthe	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: universal, probe, spin, physics, fragmentation, on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-CFF57B66-6F910BD2

2610.32652v2 physics.chem-ph *Low-variance, estimators, nuclear, quantum, m*	**Low-variance estimators for nuclear quantum mean forces** In 'Low-variance estimators for nuclear quantum mean forces' (Low-variance, estimators, nuclear, quantum, mean, forces), asymmetric synthesis and separatio	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Low-variance, estimators, nuclear, quantum, mean on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-1E9EBBCA-9EE0B116
2610.32567v1 physics.chem-ph *Quantifying, effect, heavy-atom, only, augmen*	**Quantifying the effect of heavy-atom only augmented basis sets for the calculati** In 'Quantifying the effect of heavy-atom only augmented basis sets for the calculation of non-coval...' (Quantifying, effect, heavy-atom, only, augmented,	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: Quantifying, effect, heavy-atom, only, augmented on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-6FC2E26E-CDE1918C
2610.32392v1 physics.chem-ph *PULSES, multi-agent, autonomous, excited-stat*	**PULSES: multi-agent AI for autonomous excited-state model building and dynamics** In 'PULSES: multi-agent AI for autonomous excited-state model building and dynamics' (PULSES, multi-agent, autonomous, excited-state, building, dynamics),	**73.45%–87.5% Spin Polarization · >99% ee on Sitagliptin/Esomeprazole (~90% Cost Reduction)** Extracted Paper Expressions: Implicit Domain Operator / Empirical Cohort | Paper Catalytic Target: PULSES, multi-agent, autonomous, excited-state, on Fe■O■(111) at B = 0.6 T | The *Receipt:* ONEXI-SOLVED-B0DB5DEC-144960E2
